

## Specialties Eligible/Not Eligible for Financial Care

Many doctors, ambulance companies, and labs are separate businesses with their own billing and account procedures. Below is a list of specialties that are regularly offered to St. Luke's patients, and may or may not participate in the same healthcare insurance contracts or offer the same financial options, including financial Care. To be considered for St. Luke's Financial Care, services must be delivered by a provider/physician who St. Luke's bills for and follows the St. Luke's Financial Care Policy. If you are unsure if your provider/physician follows the St. Luke's Financial Care Policy, please contact the provider/physician.
